

DC866 installation

DC866 is a normal wall switch which is used for moving one switch motor.

If You want to move more motors with one switch than You have to use the DC209 relay. (1 relay for every two motors...see relay installation).

Allways use a professional electrician for the 230 voltage power installation.

You need a series terminal for the installation as You see the picture below!

Motor

230 voltage power
