Smart Box Installation (DD7006M)

1. Download the **ShadeMate** app.
2. Select the **Sign Up** option.
3. Choose the **appropriate region** (Africa, Asia, Europe) and enter a username.
4. Create a password with a minimum of 8 characters (make sure to save the provided backup code).
5. Log in to your account.
6. Tap the **plus (+)** icon in the top right corner.
7. Select **Add New Hub**.
8. Press and hold the **Setting** button on the device for 5 seconds (until it flashes purple), then tap **Next**.
9. Scan the **QR code** on the back of the device.
10. If a „Bridge" label appears and it asks to add to "Myhouse", add the requested device. Give it a name and tap **DONE**.
11. The hub will start connecting (this takes approximately 20 seconds).
12. Give the device a name within the app and tap **Next**.
13. Add the first room where the device will be installed, then tap **DONE**.
14. **The device will update** (this may take some time).
15. Installation is now complete.

Pairing the BIDI Motor

1. First, create the **rooms** where the motors will be installed.
2. Tap the **plus (+)** icon in the top right corner.
3. Select the **Add New Radio Device** option.
4. Choose **Roller Shutter** (for Venetian blinds, select **Venetian Blinds**), then tap **NEXT**.
5. Select the bridge device, then tap **NEXT** again.
6. Choose the **By Remote** option and tap **NEXT**.
7. An animation will appear – tap **Next** again.
8. Pairing procedure:

   - Press the **P2 button** (located on the top left on the back of the remote).
   - The motor will respond (e.g. with a short movement), then press the **P2 button** again – the motor will start **continouos movement** („jogging") mb).

9. Pairing is now complete – tap **DONE**.
10. Name the motor and assign it to a room.
