

### Smart Box Installation:

1. Download the **Connector** app.
  2. Select the **Sign Up** option.
  3. Register with your email (you will receive a 6-digit code via email), or with a username (you will receive a backup code).
  4. Log in to your account.
  5. Tap the **plus (+)** icon in the top right corner.
  6. Find and select the image of the **7006A type**.
  7. Press and hold the **Setting** button on the device, then tap **Next**.
  8. Select the device that appears.
  9. Choose your connection method:
    - **Connect via Wi-Fi:** connect to your local Wi-Fi network and enter the password.
    - **Connect via Internet:** simply plug the UTP cable into the Wi-Fi router – the device will update automatically.
  10. The hub will begin connecting (this takes about 20 seconds).
  11. Give the box a name.
  12. The box will update (this may take a few minutes).
  13. The box is now successfully connected.
- 

### BIDI Motor Pairing:

1. First, create the rooms where you will install the motors.
2. Tap the **plus (+)** icon in the top right corner.
3. Select the **Radio Motor** option.
4. Choose the **Roller Shutter** option and tap **Next**.
5. Select your **bridge** and tap **Next**.
6. Select the **By Remote** option and tap **Next**.
7. An animation will appear – tap **Next**.
8. Pairing begins:
  - Press the **P2 button** (upper left programming button on the back of the remote).
  - The motor will give a signal (e.g. a short movement), then press the **P2 button** again – the motor will begin to jog continuously.
9. Pairing is complete. Tap **Next**.
10. Give the device a name and assign it to a room.
